**FOR IMMEDIATE RELEASE:**

## **TMG Develops Mobile Training Apps for U.S. Army Rapid Equipping Force (REF)**

**SPOTSYLVANIA, VA** - October 21, 2011 - TMG delivers mobile apps to support the U.S. Army Rapid Equipping Force representing a "state of the industry" capability to meet the needs of soldiers around the world. Not only were the products developed using web based training technology TMG went one step further to enable learning at the point of need with five sustainment training packages for Hybrid Energy Generation Solutions as well as a Command Level Energy Resource Management Tool consistent with the current Army Persistent Learning initiatives supporting the Army Learning Concept 2015 vision. TMG's training experts used the latest in Android App Technology to develop the Energy Solutions Training Packages giving soldiers the ability to utilize the latest in solar energy generating technologies for outlying operation bases around the world. With this technology, the U.S. Army is able to train today's soldier in the latest sustainment methods and equipment by delivering the most up-to-date training to the point of need, our troops on the ground. Our nation's fighting forces must remain agile and adaptable during combat operations and this technology provides training capabilities directly to the end user and readily available in the palm of their hands via Android Smartphones and Android Tablets. TMG is proud to support our troops by providing training expertise through our electronic services to make it easier for them to protect our Nation and themselves.

For a Demo of this Training Service, please visit [http://www.tmgva-dev.com/REF/ref\\_home.html](http://www.tmgva-dev.com/REF/ref_home.html)
